Processing

Release 1 of the VM ETECS support has been delivered to P&PD and is now being used for a majority of the ETECS jobs. This software permits files to be transported automatically from VM to the P&PD document composition system. It represents the culmination of over 4 years of efforts to create an automated link. An enhanced version of the software is currently being developed. []

The search continued for the 4 missing cables mentioned in last week's report. We were able to track down other addresses on the cables and determine that they had not received their copies. The customer, OPA, has had their hardcopy version from Cable Secretariat turned off for some time. Due to this, their analyst did not receive the cables at all. []
